Therapeutic Assessment Through a Social Justice Lens: Fostering Equity in Advanced Practi

10:00 AM - 12:00 PM CST

Summary of presentation: In this 2-hour webinar, Dr. Ksera Dyette will apply the principles of Therapeutic Assessment to forensic work with diverse populations. Drawing on case examples, she will lead participants in exploration of systemic challenges and biases in forensic assessment, discussion of equity and social justice in forensic assessment, and advanced application of the TA model in this context.

A Brief Introduction to Therapeutic Assessment

Virtual Event

10:00 AM - 02:15 PM CST

Guidelines

This 4-hour workshop is designed for practitioners interested in learning the basics of the Therapeutic Assessment (TA) model, developed by Stephen Finn, PhD and his colleagues. Focusing on the steps of Adult TA, participants will learn the core values and interpersonal stance of TA that contribute to successful application of the model. Key concepts related to TA will be presented, and common psychological tests used in the model will be introduced. As the steps of the model are explained, clinical vignettes, including video and test data will illuminate the application of this approach, including developing questions to answer through the testing and exploring tests results to build client insight. Workshop participants will be well-prepared to participate in the upcoming 4th International Collaborative/Therapeutic Assessment Conference (June 12-14, 2025 in

Salt Lake City). More information on CTAC [here](#).
